PAEDIATRIC OPHTHALMOLOGY FOR OPTOMETRISTS

Friday 18th of October 2013
a one day intensive teaching-training course

Venue: The Conference Centre at LACE – Liverpool

**Course Organiser: Mr Arvind Chandna –
Consultant Paediatric Ophthalmologist
Alder Hey Children’s Hospital
Liverpool**

The course is designed around a symptom and sign based clinical approach with resulting management decisions followed by clinical care pathways for treatment

This one-day course covers all the competencies required for pre-registration optometrists and much more. It adds value to your training by practical interactive skills transfer sessions and small group tutorials.

For practicing optometrists this would be useful for an update, practice skills ask questions and participate in case based discussions with a practical approach.

Eyelearn is a teaching and learning organisation in Ophthalmology founded on the best principles of education: teaching, training and instruction in active partnership with learners. Eyelearn has a special emphasis on Paediatric Ophthalmology.
