

A close-up photograph of a human eye with a brown iris, looking slightly to the right. The eye is the central focus of the upper half of the poster.

Intensive Four-Day Revision Course In the Basic Sciences for Ophthalmic Exams

3 – 6 September 2019

This four-day intensive revision course covers the major topics examined for the Royal College of Ophthalmologists' FRCOphth Part I Fellowship and International Council of Ophthalmology's Basic Science assessments. The course also includes theoretical optics and refraction, plus advice on exam techniques, taught by experts in the field (from UCL Institute of Ophthalmology, Moorfields Eye Hospital, and other departments).

Topics include:

- Biology of the cell
- Anatomy of the head and neck
- Nervous system and vision
- General physiology
- Microbiology
- Immunology
- Pharmacology
- General principles of pathology
- Optics & Theoretical Refraction
