Centre for Sight

The Queen Victoria Hospital's Corneoplastic Unit and Eye Bank is a specialist and tertiary referral centre for complex corneal problems and oculoplastics. It is a high-profile and technologically advanced department that innovates internationally.

The Course

A two-day intensive update on modern-day Corneal and Oculoplastic surgery. Delivered by means of small group tuition and hands on assessment of our patients. Candidates will receive a comprehensive Course folder, which will prove invaluable for future reference.

Topics Covered – Cornea:

- Refractive Surgery introduction
- Microbial Keratitis
- Lamellar Keratoplasty: DSAEK, DMEK and DALK
- Keratoprosthesis
- Keratoconus

Topics Covered – Oculoplastics:

- Watery Eye
- Ptosis
- Entropion and Ectropion
- Periocular Malignancy
- Orbital Imaging
- Thyroid Orbitopathy

Testimonials

"Your ethos of delivering the best quality of patient care was clearly portrayed throughout the course which was refreshing and very motivating" "Excellent course" "Brilliant course" "Great course" "Very well organized" "Thoroughly enjoyable course and worthwhile" "Clinical cases were very useful indeed" "The cases were just great" "...will stick in mind much better having seen real patients" "Always someone available for questions"
